<i>Hyla spp.</i>	<i>1</i>	<i>H</i>	<i>Ad</i>	<i>SE</i>	<i>50% (not sure Canebrake or regilla)</i>

Describe potential threats to California red-legged frogs observed, including non-native and native predators such as fish, bullfrogs, and raccoons: raccoon tracks

observed in mud beneath bridge.

Other notes, observations, comments, etc.

Possible CRLF (RADR) darted underwater in creek, disappeared under a pile of logs & sticks. In an area of very suitable habitat w/ overhanging banks. ~~the~~ Large b/c it dashed up a lot of mud from the bottom of the creek. Likely either Ranid frog or crayfish. although we have not seen crayfish in creek; we did see CRLF @ that site last calendar year.
